

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

**Carter's 'Shooting in Early Days.'**—In a neatly printed little pamphlet issued privately by Mr. Charles Morland Carter he describes his experiences as a gunner beginning about the year 1864. His early reminiscences deal with New England and are full of association with William Brewster and Ruthven Deane, two of his boyhood acquaintances. Later come his experiences in Iowa, Kansas, Oklahoma and other portions of the middle West.

Besides the interest that attaches to a personal narrative of this kind there is much of value to the ornithologist in the accounts of the Quail and Woodcock shooting of those times and the several mentions of Passenger Pigeons, especially of a trap shooting contest at Concord Junction in 1872, in which Deane and Brewster participated and in which the birds were 200 Passenger Pigeons purchased for the occasion.

If other sportsmen whose experiences date back to the sixties, would follow Mr. Carter's example we should have preserved many valuable records of the early abundance of game birds which otherwise will be lost forever.—W. S.

**Recent Publications on Conservation and Education.**—The April 1920, number of the 'Nature Study Review'<sup>1</sup> is a bird-study number containing many short articles on various species. The most noteworthy contribution is by Anna B. Comstock: 'Suggestions for a Graded Course in Bird Study' which will be welcome to many teachers. The suggestion is made of collecting one or more old nests and mounting them in cardboard boxes beside which may be mounted a standard outline drawing of the species colored by the student. The use of colored drawings instead of mounted birds or skins will soon become a necessity as the supply of old birds in museums, etc., becomes exhausted.

Mr. John H. Wallace's 'Alabama Bird-day Book'<sup>2</sup> is as usual an admirable assistant to teachers engaged in conducting Bird-Day exercises. This year's issue contains a special article by E. H. Forbush on the migration of North American birds into the countries to the south of us and the importance of securing co-operation there for their protection as has been accomplished with Canada on the north.

Miss Althea R. Sherman has an interesting 'Historical Sketch of the Park Region about McGregor, Iowa, and Prairie Du Chien, Wisconsin'<sup>3</sup> in 'Iowa Conservation' Vol. III. Nos. 1 and 2, in which she advocates the establishment of a park or reservation on the Iowa side of the Mississippi, opposite the one secured by Senator Robt. Glenn at the mouth of the Wisconsin River.
